PEDIATRIC NEUROLOGY
Subject Index Volume 16

Adenylosuccinate lyase deficiency with severe hypotonia, 252
Aicardi-Goutières syndrome, 323
Alpers disease, and valproate-induced liver failure, 337
Angelman syndrome, assessed by neurological and molecular cytogenetic investigations, 17
Anisotrophy, diffusional, and differentiation of dys- and demyelination, 63
Antiganglioside antibody, elevated serum, and cranial polyneuropathy, 149
Anti-Gal C antibody, elevated serum, with mycoplasma infection, and encephalomyelitis subsequent to, 241
Apoptosis in development and disease of the nervous system
  In childhood neurologic disease, 93
  Naturally occurring cell death in the developing nervous system, 9
Arachnoid cyst, massive intracranial, in a developmentally normal infant, 59
Argyrophilia, and topography of hypoxic injury in postnatal rat brain, 105
Autistic disorder, 353
Autistic regression, severe, surgical treatment of, in epilepsy, 137

Baclofen, failure of absorption after rectal administration, 351
Biliary atresia, and evoked potential abnormalities, 206
Book reviews
  Atlas of Neuroradiology: Steven K. Willing/Author, 356
  Clinical Pediatric Neurology: Gerald M. Fenichel/Author, 355
  Manual of Methods for Recording and Analyzing Sleep-wakefulness States in Preterm and Full-Term Infants/Lilia Curzi-Dascalova & Majid Mirmiran/Authors, 354
  MRI of the Brain: Normal Anatomy and Normal Variants: Vimal H. Patel & Lawrence Freeman/Authors, 355
  Neurology and Trauma: Randolph W. Evans/Editor, 354
  Pediatric Behavioral Neurology: Yitzchak Frank/Editor, 355
Brain anomalies with migration disorder, and expression of the LIS-1 gene product, 42
Brain atrophy in congenital neuromuscular disease with uniform type 1 fibers, 56
Brain function and maturation, neurophysiological assessment
  Measure of brain adaptation in high risk infants, 198
  Measure of brain dysmaturity in healthy preterm neonates, 287
Brain injuries, acquired, and late improvements in mobility, 306
Brainstem dysfunction, electrophysiological, and Leigh disease, 329

Cavum septum pellucidum, role in akinetic mutism of hydrocephalic children, 156
Cell adhesion molecule L1, immunohistochemical expression of, in hemimegalencephaly, 45
Cell death, naturally occurring, in developing nervous system, and apoptosis, 5
Cerebral blood flow velocity and pulsation in neonatal respiratory distress syndrome and periventricular hemorrhage, 119
Computed tomography scans, cranial, in premature babies to predict eventual learning disabilities, 319
Convulsions, non-benign familial neonatal, and bilateral tonic-clonic epileptic seizures, 249
Copper, zinc-superoxide dismutase reaction in neonatal pontosubicular neuron necrosis, 126

Dandy-Walker malformation, familial, and leukodystrophy, 326
De- and dysmyelination using diffusional anisotrophy, differentiation of, 63
Diet- and valproate-induced transient hyperammonemia, effect of L-carnitine, 301
Dihydroergotamine, oral, for therapy-resistant migraine, 114
Down syndrome, and ocular abnormalities, 311
Duchenne muscular dystrophy, 166
Dys- and demyelination using diffusional anisotrophy, differentiation of, 63

Encephalomyelitis subsequent to mycoplasma infection with elevated serum anti-Cal C antibody, 241
Encephaloneuropathy with lysosomal zebra bodies and GM2 ganglioside storage, 141
Encephalopathy, occipital-parietal, 145
Epilepsies, electroclinical study, 131
Epilepsy
  Intractable generalized, and lamotrigine, 201
  Surgical treatment of severe autistic regression in, 137
  Temporal lobe pathology in, proton magnetic resonance spectroscopy and positron emission tomography study, 98
Epileptic seizures, bilateral tonic-clonic, in non-benign familial neonatal convulsions, 249
Epileptiform discharges, positive, with neuronal migration disorders, 23
Evoked potential abnormalities in postoperative patients with biliary atresia, 206

Fibers, uniform type 1, in congenital neuromuscular disease, with brain atrophy, 56

GM2 ganglioside storage and lysosomal zebra bodies, and encephaloneuropathy, 141
Guillain-Barré syndrome, severe, and immune globulins, 32

Head trauma, and postural stability by computerized posturography, 259
Hemimegalencephaly, and immunohistochemical expression of cell adhesion molecule L1, 45
Hepatic failure, pemoline-associated, 14, 353
High risk infants, brain adaption, neurophysiological assessment of brain function and maturation, 191
Hopkins syndrome associated with *mycoplasma* infection, 54
Hydrocephalic children and akinetic mutism, role of cavum septum pellucidum in, 156
Hyperammonemia, diet- and valproate-induced transient, and effect of L-carnitine, 301

Hypomyelinating neuropathy
Congenital, a reversible case, 71
Severe, unexpected recovery, 245
Hypotension, intracranial, caused by lumbar puncture, 163
Hypotonia, severe, with adenylsuccinate lyase deficiency, 252
Hypoxic injury, topography of, proved by argyrophilia in postnatal rat brain, 105

Immune globulins, effective on severe Guillain-Barré syndrome, 32
Immunohistochemical expression of cell adhesion molecule L1 in hemimegalencephaly, 45
Infantile spasms
Focal features indicating candidacy for surgery, 213
Seasonal onset differences and zeitgebers, 220
Iron deficiency, a cause of stroke, 50
Isolated dihydroxyacetone-phosphate acyltransferase deficiency, peroxisomal, and abnormal myelination, 232

Lamotrigine, prospective, open-label, add-on study in intractable generalized epilepsy, 201
L-carnitine, effect on diet- and valproate-induced transient hyperammonemia, 301
Learning disabilities, prediction by use of cranial computed tomography scans in premature babies, 319
Leigh disease, and electrophysiological brainstem dysfunction, 329
Leptomeningeal fibrosis and the delayed diagnosis of a central nervous system neoplasm (primitive neuroectodermal tumor), 74
Leukodystrophy and familial Dandy-Walker malformation, 326
Leukoencephalopathy, cystic, in a megalencephalic child, clinical, MRI/MRS findings, 347
Leukomalacia, characteristic neuropathology in extremely low birthweight infants, 296
LIS-1 gene product, expression of, in brain anomalies with a migration disorder, 43
Liver failure, valproate-induced, and Alpers disease, 337
Low birthweight infants, and leukomalacia, 296

Medium chain acyl-CoA dehydrogenase deficiency and fatal valproate toxicity, 160
Megalencephaly, and cystic leukoencephalopathy, clinical, MRI/MRS findings, 347
Migraine, therapy-resistant, and oral dihydroergotamine, 114
Migration disorder with brain anomalies, and expression of LIS-1 gene product, 42
Migration disorders, neuronal, and positive epileptiform discharges, 23
Mobility, late improvements, after acquired brain injuries, 306
Moebius syndrome and central respiratory dysfunction, 237
Motor axonal neuropathy, acute, clinical and MRI findings, 152
Movement disorder, rhythmic, diagnosis with video polysomnography, 37
MRI meningeal enhancement with intracranial hypotension caused by lumbar puncture, 163
MRI/MRS findings in megalencephalic child with cystic leukoencephalopathy, 347
Mutism
Akinetic, role of cavum septum pellucidum in, and hydrocephalic children, 156
Cerebellar, 218
Mycoplasma infection
And Hopkins syndrome, 54
With elevated serum anti-Cal C antibody, and encephalomyelitis, 241
Myelination, abnormal, in peroxisomal isolated dihydroxyacetone-phosphate acyltransferase deficiency, 232
Myotonic dystrophy, congenital, haplotype analysis, 315

Nemaline myopathy and respiratory failure, 344
Neuroectodermal tumor, primitive, delayed diagnosis of, and leptomeningeal fibrosis, 74
Neuromuscular disease, congenital, with uniform type 1 fibers, and brain atrophy, 56
Noonan syndrome and moyamoya, 256

Ocular abnormalities in Down syndrome, 311
Opsoclonus-myoclonus syndrome with abnormal SPECT imaging, 334

Pemoline-associated hepatic failure, 14, 353
Periventricular hemorrhage and neonatal respiratory distress syndrome, cerebral blood flow and pulsation, 119
Polyneuropathy, cranial with elevated serum antiganglioside antibody, 149
Polysomnography, video, and diagnosing rhythmic movement disorders, 37
Pontosubicular neuronal necrosis, Cu,Zn-superoxide dismutase reaction in, 126
Positron emission tomography and proton magnetic resonance spectroscopy study of temporal lobe pathology in epilepsy, 98
Postural stability by computerized posturography in minor head trauma, 259
Proton magnetic resonance spectroscopy and positron emission tomography study of temporal lobe pathology in epilepsy, 98

Respiratory distress syndrome, neonatal, and periventricular hemorrhage, cerebral blood flow velocity and pulsation, 119
Respiratory dysfunction, central, and Moebius syndrome, 237
Respiratory failure in nemaline myopathy, 344

Sarcolemmopathies, muscle pathology and clinical features, 79
Seizures, electrographically identified, 225
SPECT imaging, abnormal, in opsoclonus-myoclonus syndrome, 334
Stroke, caused by iron deficiency, 50

Valproate- and diet-induced transient hyperammonemia, effect of L-carnitine, 301
Valproate toxicity, fatal, and medium chain acyl-CoA dehydrogenase deficiency, 160
Vertebral artery dissection, intracranial, 67

West syndrome
Focal features indicating candidacy for surgery, 213
Seasonal onset differences and zeitgebers, 220

Zebra bodies, lysosomal, and GM2 ganglioside storage, and encephaloneuropathy, 141
Zeitgebers and seasonal onset differences in infantile spasms, 220
